1. What Would I Do?

Automotive service technicians, truck and bus mechanics and mechanical repairers inspect, diagnose, repair and service mechanical, electrical and electronic systems and components of cars, buses and light and commercial transport trucks.

Automotive Service Technicians' duties include:

- adjust, repair or replace parts or components of automotive systems (i.e., fuel systems, brakes, steering and suspension, engines and drive trains, emission control and exhaust, cooling and climate control, and electrical and electronic systems), using hand tools and other specialized automotive repair equipment
- inspect motor operation, road test motor vehicles, and test systems using computerized and other testing devices to diagnose faults

Truck and transport and truck-trailer mechanics' duties include:

- Adjust, repair or replace parts and components of commercial transport truck systems including chassis, frame, cab, body, engine and drive train, air brakes, steering, and fuel, hydraulic, electrical and electronic systems
- Adjust, repair or replace parts and components of truck-trailer systems including structural, brake and electrical systems.

Mechanical repairers' (motor vehicle manufacturing) duties include:

- inspect and test mechanical units, such as engines, transmissions, axles and brake systems to locate faults and malfunctions
- diagnose malfunctions and determine with supervisors whether to repair or replace units
- test and adjust units to performance specifications, repair or replace mechanical units or components, and complete reports to record the work done and any problems that occurred

2. Am I Suited For This Job?

Important skills:

- *good hand-eye coordination*
- *mechanical aptitude and interest*
- *logical thinking and decision making*
- *able to keep up to date with changing technology*
- *physically fit*
- *communication skills*

The work can be physically demanding. You spend a great deal of time on your feet, and will often be required to bend, crawl, lift and reach.

Technicians usually work indoors and can expect a work environment that includes noise, fumes, odours, hazardous materials, and confined spaces.

4. What Is The Job Outlook In BC?

Due to the large size of this occupational group, many job opportunities will arise from worker turnover. As well, more than three-quarters of future job openings will come from retirements.

Low interest rates, dealer incentives and population growth previously resulted in strong motor vehicle sales, which resulted in more cars that require servicing. Also, after-warranty specialty shops that provide fast, low-cost maintenance for such items as oil changes, brakes and mufflers represent a particular growth area.

Chart from WorkBC <https://www.workbc.ca/Job-Seekers/Career-Profiles/7321>

JobBank Canada reports that for the 2016-2018 period, the employment outlook is expected to be good for Automotive service technicians, truck and bus mechanics and mechanical repairers (NOC 7321) in British Columbia and employment growth is expected to be strong..

5. How Do I Become an Automotive Service Technician?

Automotive Service Technician is an Inter-provincially recognized Red Seal trade. With a Red Seal, you can work in this trade anywhere in Canada.

In BC certification as an automotive service technician is not mandatory. However certification is required by many employers and will likely increase your employment opportunities. You can become a certified technician by completing an Apprenticeship Program. The program is comprised of Levels 1-to-4 of progressive technical training. Each level takes approximately 7 weeks to complete and certification can be achieved at any level. You require an employer to sponsor you in order to enrol in the Apprenticeship Program.

If you have extensive experience working as an automotive service technician but have never been certified in Canada you may apply to challenge the certification.

Foundation programs, where available, provide those who don't have work experience or employer sponsorship with the opportunity to gain the required skills to enter the occupation. Register directly with a training provider to enrol in a

Foundation program. See: <https://www.tradetrainingbc.ca/Trades/Automotive-Trades/Automotive-Service-Technician/Foundation-Schedules>

Networking, Volunteering and Temporary Agencies

Many positions are filled by people who have been recommended by someone they know. Networking, working as a volunteer or registering with a temporary employment agency are good ways of helping you find jobs and meet people in your industry.

Networking and the Hidden Job Market:

When looking for work, be sure to talk to friends, relatives and neighbours. They may know someone who is hiring! Working as a volunteer, attending events, and joining clubs and associations are good ways to gain "Canadian experience." They are also good ways to meet people to learn about the local job market.

7. Applying for a Job

In Canada, employers usually expect to receive a resume and a cover letter that identifies the position you are applying for and summarizes your experience.

Use the library catalogue, <http://vpl.bibliocommons.com/> to find books on writing resumes and cover letters specific to your industry.

For more information see:

- **Writing Resumes and Cover Letters**
Go to <http://skilledimmigrants.vpl.ca>
[Search Writing Resumes and Cover Letters]

8. Where Can This Job Lead?

With experience you may move up to foreperson, shop supervisor, service advisor or service manager. Some technicians open their own garage or automotive specialty shop.

With additional training it is also possible to move into occupations such as automotive instructor, truck and transport mechanic or heavy duty equipment technician.
