1. Working as a Web Designer & Web Developer [NOC 2175]

Job Description

Website designers design Internet sites. You plan the look and layout of the website.

Web developers handle the technical tasks of building websites. You plan the framework and work with programming tools and databases to make the site function.

As a web designer and developer you perform the following duties:

- Consult with clients to develop and document requirements
- Prepare mock-ups and storyboards
- Develop website architecture and determine hardware and software requirements
- Design the appearance, layout and flow of the website
- Create content using a variety of graphics, animation and other software
- Conduct tests and perform security and quality controls
- May lead and co-ordinate multidisciplinary teams

Industry Overview

Demand for web designers and developers is expected to increase in coming years.

You will be in particularly strong demand if you have a high level technical knowledge and are able to work on large complex systems. There is a sufficient supply of new graduates willing to do basic web design. Employers require individuals with substantial experience in “information architecture.” Information architecture refers to the design of clear and understandable information through the effective organization of content, in terms of navigation, layout and search functionality.

You will increasingly need to use social media in developing websites. Web design for mobile devices is also increasing.

Many web designers are also graphic designers. If you work as a self-employed “freelancer” you may assume many roles including:

- project manager
- technical expert
- salesperson
- designer

Larger urban centres in the province offer more opportunities for full-time work and work on more challenging web development and design projects.

Job Outlook in BC

Web Designers and Developers, NOC 2175

Chart from WorkBC

The **Employment Outlook for BC** provides job openings projections for web designers and developers within BC regions:

Region	2010 Estimated Employment	2015 Estimated Employment	Avg Annual % Change, 5 Years, 2010 to 2015
Vancouver Island	740	830	2.5%
Lower Mainland / Southwest	2,800	3,340	3.9%
Thompson-Okanagan	330	350	1.0%
Kootenay	50	60	4.7%
Cariboo	50	50	0.2%
North Coast & Nechako	40	40	0.4%
Northeast	20	20	0.8%

You can learn more about working as a web designer or web developer in BC from:

- **WorkBC Career Profiles** <http://workbc.ca/Careers>
- **Career Cruising** (Profiles for Web Developer and Website designer)

Types of Employers

Web designers and web developers work for a variety of businesses and organizations including:

- computer software development firms
- information technology consulting firms
- information technology units throughout the private and public sectors

You may also be self-employed, working for a variety of clients (anyone who needs a website).

Salary

The average annual salary for web designers and developers in BC is between \$44,000 and \$53,000. Your salary depends on experience, technical knowledge, location, and employer.

If you work as a self-employed freelancer, you enter into contracts where you may be paid an hourly rate, a flat service fee, or an amount based on the number of pages you develop for a site. Your earnings will vary depending on the amount of business that you are able to secure.

Full-time web designers and developers usually receive benefits in addition to a salary. These may include paid sick days, vacation time, and dental coverage. If you are self-employed, you must provide your own benefits.

Creating a List of Potential Employers

You can use directories to produce lists of web design and e-commerce companies in the Lower Mainland or BC. Contact them directly to find out if they're hiring.

- **BC Tech, Technology Guide** (special issue of BC Tech magazine)
Available at the Central Library, 380 EL3CBh
- **T-Net British Columbia Directory**
<http://www.bctechnology.com/statics/director.cfm>
- **Information and Communications Technology Council Employer Directory**
<http://employerdirectory.ictc-ctic.ca/>
- **Canadian Company Capabilities. Information & Cultural Industries**
<http://www.ic.gc.ca/eic/site/ccr-rec.nsf/eng/00043.html>

- **Reference Canada**

<http://www.vpl.ca/digital-library/reference-canada>

Go to the "Reference Canada" database, choose the "Custom Search" button, and select both "Keyword/SIC/NAICS" under Business Type and "City" under Geography. In the top search box enter "website" and click LOOKUP. Select the appropriate headings. Lower down, select the Province, choose the cities, and click the "View Results" button.

Available from the VPL Online Articles, Encyclopedias & More page

***NOTE:** You can access this database from the Library or from home. If you are using a computer from home or outside the library, you will need a Vancouver Public Library card to login to this database. After clicking on the database name, you will be asked to enter your library card number and PIN (usually last four digits of your telephone number).*

4. Applying for a Job

In Canada, employers usually expect to receive a resume (curriculum vitae) and a cover letter. These should identify the position you are applying for and summarize your relevant experience.

Use the library catalogue, <http://vpl.bibliocommons.com/> to find books on writing resumes and cover letters specific to your industry.

To learn about applying for jobs in Canada, use the following guides which are available in print at the Central Library or online:

- **Writing Resumes and Cover Letters**

Go to <http://skilledimmigrants.vpl.ca>

[Search Writing Resumes and Cover Letters]

- **Getting Canadian Work Experience**

Go to <http://skilledimmigrants.vpl.ca>
