1. Working as a Medical Laboratory Technologist and Technician [NOC 3211 & 3212]

Job Description

Medical laboratory technologists [NOC 3211] conduct a variety of medical laboratory tests to assist in the diagnosis, treatment and prevention of disease.

As a *medical laboratory technologist* you perform the following duties:

- Conduct analyses of blood, urine and other body fluids
- Prepare tissue sections for microscopic examinations
- Conduct blood group, type and compatibility tests for transfusion purposes
- Set up, operate and maintain laboratory equipment
- Conduct quality control assessment of testing techniques

You may specialize in the following areas:

- clinical chemistry - chemically analysing blood and other body fluids
- clinical microbiology - culturing and identifying micro-organisms and determining antibiotic sensitivities
- hematology - studying blood cells
- histotechnology - preparing tissue specimens for microscopic examination
- transfusion medicine - taking and testing blood to determine its suitability for transfusions and preparing blood products
- cytotechnology - microscopically examining prepared cellular slides for evidence of abnormality or disease

Medical Laboratory Technologists & Technicians *A guide for newcomers to British Columbia*

- clinical genetics - analysing patient tissue to determine the presence of a pre-existing genetic condition

Medical laboratory technicians [NOC 3212] conduct routine medical tests and set up, clean and maintain equipment.

As a *medical laboratory technician* you perform the following duties:

- Collect blood or other samples from patients
- Conduct routine laboratory tests and sample analyses
- Log patient samples and prepare them for testing
- Set up, clean and maintain medical laboratory equipment

Industry Overview

There is currently a shortage of medical laboratory technologists and technicians in B.C.

There is an increased demand for *general medical laboratory technologists*. You may be in particularly high demand if you are willing to move to rural and remote communities in BC.

You may find new job opportunities in hospitals and medical laboratories that provide contracted diagnostic services. New job creation for clinical genetics technologists is also expected as a result of the growth of molecular testing.

2. Skills, Education and Experience

Skills

- must be detail oriented and able to follow strict procedures
- require a high level of accuracy, both in work procedures and in maintaining concise records
- good communication and interpersonal skills
- ability to work both independently and as part of a team

Source: WorkBC

Education and Experience

To work as a ***medical laboratory technologist or technician*** you require:

- completion of a two or three year medical laboratory education program approved by the British Columbia Society of Laboratory Science
<https://www.bcsls.net/>
- certification by the BC Society for Medical Laboratory Science and/or Canadian Society for Medical Laboratory Science is not mandatory, but is usually required by employers

Qualifications

This occupation is not regulated in British Columbia.

However, many employers prefer you to be certified by the BC Society for Medical Laboratory Science (for *medical laboratory technicians*) or Canadian Society for Medical Science (for *medical laboratory technologists*). To learn about certification see:

British Columbia Society for Medical Laboratory Science

<https://www.bcsls.net/certification>

Canadian Society for Medical Laboratory Science (CSMLS)

<https://www.csmls.org/>

Internationally Trained and Medical Laboratory Technologists & Technicians

If you wish to become a certified member of the Canadian Society for Medical Laboratory Science you must:

- apply for a prior learning assessment (PLA). The PLA evaluates your education, training and work experience and compares it to the national standard.
- write the CSMLS National Certification Examinations (if your PLA assessment is satisfactory)

For more information see:

CSMLS Internationally Educated Technologist Certification Process
